Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. Figures 10A, 10B, and 11 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 13-16 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The applicant fails to disclose means in which one could make and/or use the invention in order to get the desired results recited by applicant in claims 13-16. The applicant fails to disclose the type of capacitor and/or any other mechanism that would need to be used in order to achieve the type of capacitance that would be changeable directly with the thickness of the insulating film. Also, applicant fails to disclose how the MIM capacitor is changeable inversely with the thickness of the insulating film. Simply saying that it is a MIM capacitor does not disclose whether the capacitor is self-variable,

manually variable, or non-variable. Without this information, one skilled in the art would not be sure if the invention is constructed correctly if results are not achieved. Further it is not possible to use the function of this invention if the structure is not adequately disclosed. One would be subject to undue experimentation in order to construct and verify the construction and use of the claimed invention.

Due to the present application's lack of enablement, no art rejection has been applied.

Response to Arguments

4. Applicant's arguments filed 8/6/02 have been fully considered but they are not persuasive.

Applicant's arguments describe the elements of the disclosed invention which applicant indicates as enabling. However, applicant's arguments fail to address how one would vary or change the capacitance and MIM device. Also, as noted above, the specific description of the structure does not include enough information of critical features, so as to enable one to make and use the invention. Thus, undue experimentation would be required to make and use the invention.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 2817

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
